

Inclusion, accessibility and ethical considerations

- 1** Use the template consent form linked in the resources to design your own process and form of consent for collecting data from your beneficiaries.
-
- 2** What considerations do you think you need to make to ensure that your social impact collection is accessible and inclusive for your beneficiaries?
-

survey planning

Create seven closed questions and three open questions which you plan to ask your beneficiaries. Later, you can transfer these into an online survey platform like google forms or survey monkey, so that you have a survey ready to go once you start piloting your services.
